

The Macrolepidoptera of Germany

DIE GROSS-SCHMETTERLINGE DEUTSCHLANDS

THE MACROLEPIDOPTERA OF
GERMANY

HERAUSGEBER / EDITORS:
Andreas H. Segerer & Axel Hausmann

Dieses Buch präsentiert eine vollständige systematische, kommentierte Liste der aus Deutschland bekannten Tagfalter und Großschmetterlinge (Insecta: Lepidoptera: Papilionoidea und Macrolepidoptera) auf neuestem taxonomischem und faunistischem Stand, einschließlich der Einwanderer, Irrgäste und eingeschleppten Arten. Der zweisprachige Text (deutsch/englisch) wird begleitet von 6171 hochauflösenden Farbfotografien auf insgesamt 183 Tafeln, die die Variationsbreite der insgesamt 1377 behandelten Arten dokumentieren.

This book presents a complete systematic, annotated checklist of the butterflies and larger moths of Germany (Insecta: Lepidoptera: Papilionoidea and Macrolepidoptera), up-to-date with taxonomy and faunistics, including immigrants, vagrants and artificially introduced species. The bilingual text (German/English) is accompanied by 6171 high-resolution photographs on a total of 183 plates, well reflecting the variability of the 1377 species dealt with.

The Heterocera Press Ltd. recommend you this long-awaited colour atlas introducing the diversity of the Macrolepidoptera fauna of Central Europe, a fundamental work for all European lepidopterists dealing with the traditional macro-groups. This book is the second item of the Regional Fauna series, following the Macrolepidoptera of Hungary.

These easily applicable handbooks present the complete, annotated systematic checklist of the butterflies and larger moths of the given countries, zoogeographical regions and serve as a helpful identification guide of Lepidoptera fauna. The Macrolepidoptera of Germany comprising altogether 1377 species, due to the 6171 high-resolution natural sized colour images arranged into 183 colour plates.

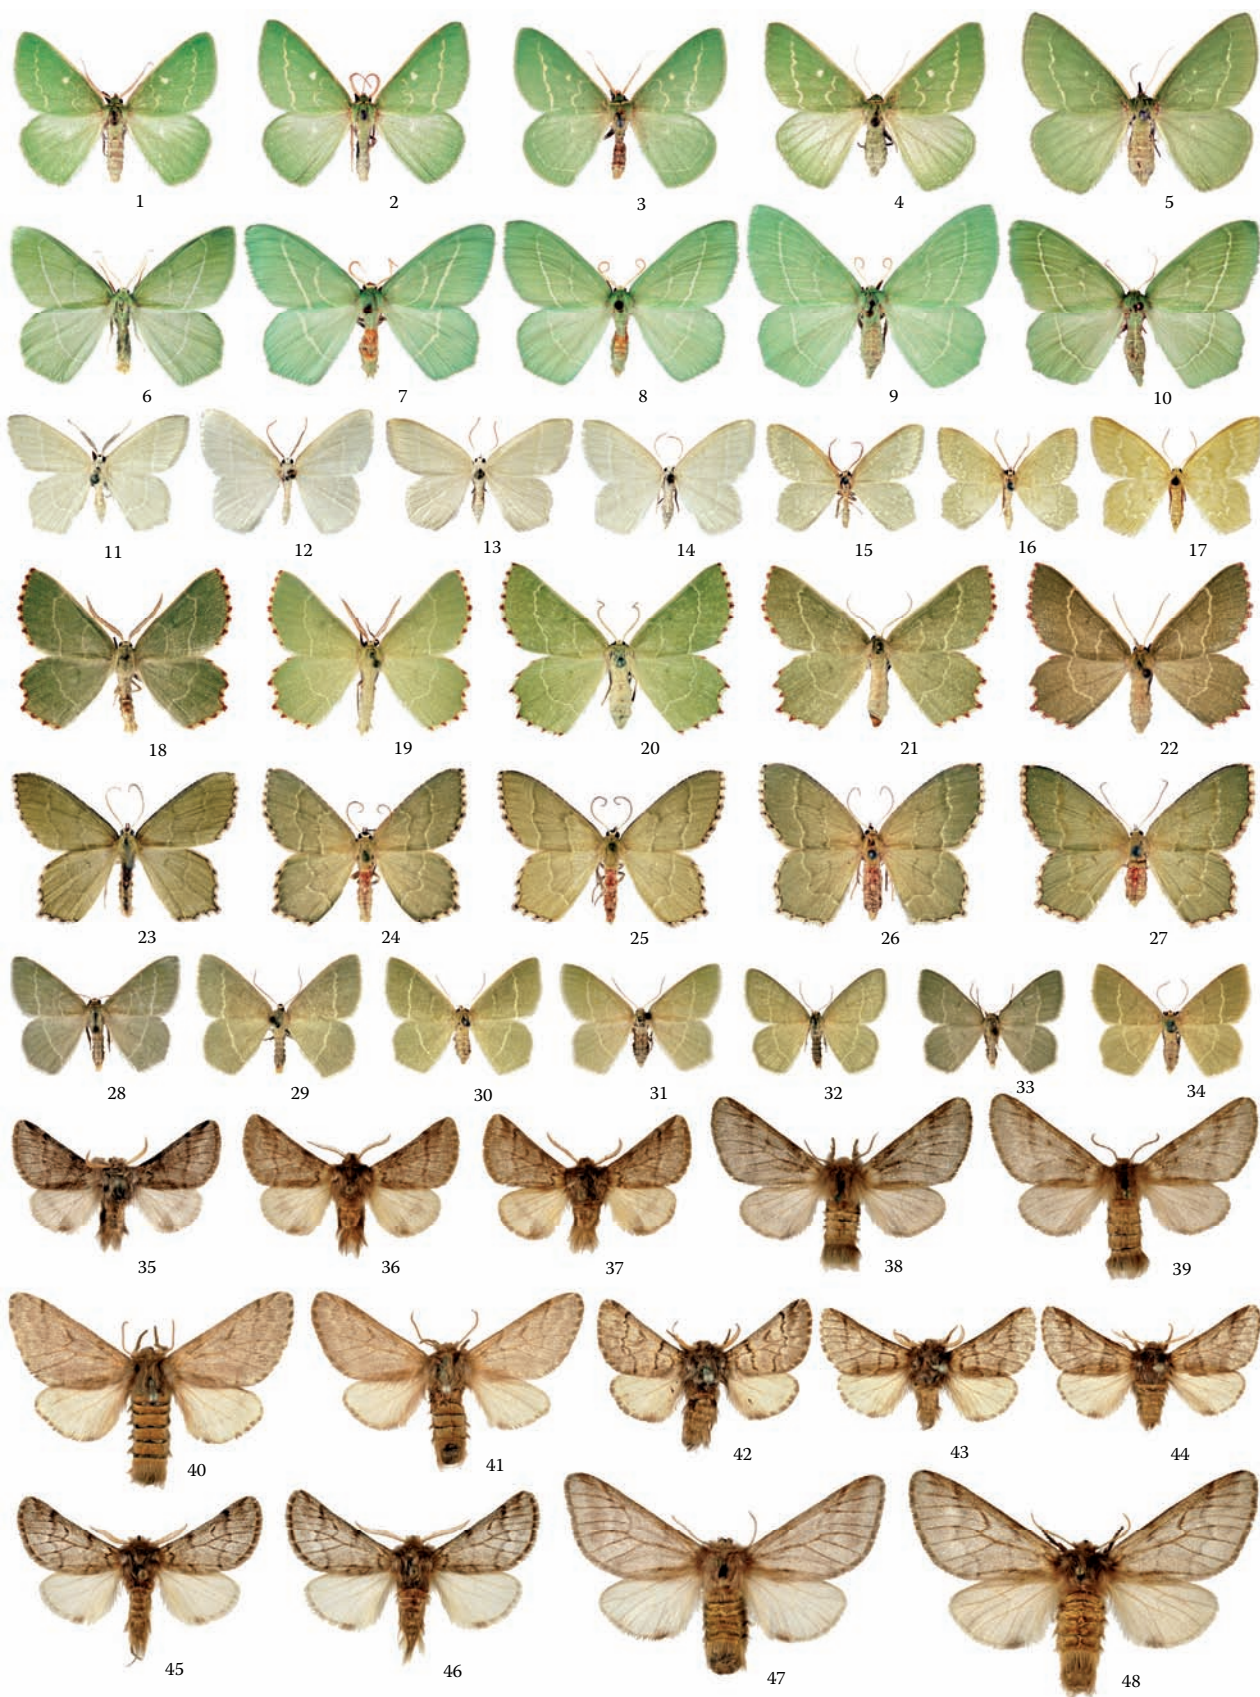

Special offer exclusively for the books ordered directly from the Heterocera Press until **31st December, 2012: 86 EUR (incl. VAT) + 10 EUR P+P (in Europe)**
